Determination of status (training time) at the University of Texas at Austin

Undergraduate*		Graduate**		Law**	
Number of hours	Status	Number of hours	Status	Number of hours	Status
12 or more	Full-time	3 or more	Full-time	6 or more	Full-time
9 - 11	¾ time	2	Half-time	4	More than half-time
6 - 8	½ time	1	Less than half-time	3	Half time
				2	Less than half-time

*VA determines status based on semester hour equivalency tables.

**VA determines status based on the school's academic regulation.

Undergraduate rate of pursuit = (credit hour equivalents ÷ 12) × 100

Graduate rate of pursuit = (credit hour equivalents ÷ 3) × 100

Law rate of pursuit = (credit hour equivalents ÷ 6) × 100

VA pays housing MHA/BAH based on the rate of pursuit rounded to the nearest multiple of ten.

Steps to determine MHA/BAH rate for Post 9/11 students:

- You must be certified for greater than 50% rate of pursuit to qualify for MHA/BAH.
- Rate of pursuit will be rounded to the nearest multiple of ten.
- You will be paid at the percentage you are eligible.

1) Determine the number of weeks in a term: Count the number of days in the enrollment period (first day through last day of finals) and divide by seven. Disregard a remainder of three days or less and add a full week if four or more days.

Example: First summer = 38 days ÷ 7 = 5 weeks, 3 days (5 weeks)

2) Convert credit hours for a short term to credit hour equivalents:

- a) The number of hours enrolled multiplied by 18 divided by the number of class weeks = credit hour equivalents.

Example: 3 hours in the first summer session: (3 × 18) ÷ 5 = 10.8 credit hour equivalents

b) You must meet the following enrollment to be considered fulltime in the summer semester:

- i) Undergraduate = 12 hours
- ii) Graduate = 3 hours
- iii) Law = 6 hours

3) Calculate rate of pursuit:

- a) The number of equivalent credit hours divided by the number of hours that the University considers fulltime multiplied by 100.

Example:

An undergraduate student has 10.8 credit hour equivalents: $(10.8 \div 12) \times 100 = 90\%$ rate of pursuit

4) Calculate rate of pursuit for multiple sessions:

Example for undergraduate students:

Class meets 6/2/2022 - 8/15/2022 (11 weeks) → W4 $[(4 \times 18) \div 11] = 6.5$ equivalent hours

Class meets 6/2/2022 - 7/28/2022 (8 weeks) → N3 $[(3 \times 18) \div 8] = 6.75$ equivalent hours

Both W4 and N3 classes meet 6/2/2022 - 7/28/2022	Only W4 class meets 7/29/2022 - 8/15/2022
Equivalent hours: $6.5 + 6.75 = 13.25 (>12)$ Rate of pursuit = $(13.25 \div 12) \times 100 = >100\%$ MHA/BAH = 100%	Equivalent hours = 6.5 Rate of pursuit = $(6.5 \div 12) \times 100 = 54.1\%$ MHA/BAH = 50%

6/2/2022 → 7/28/2022

MHA/BAH paid at 100%

7/29/2022 → 8/15/2022

MHA/BAH paid at 50%
